

ORH Outcomes Tools: County Board Data Dashboards

Ohio Recovery Housing offers free outcomes tools for operators of recovery housing. These tools capture resident data through a resident survey. Residents complete a survey when they move-in at six-months and when they move out. Each operator of recovery housing that uses the tools receives an individualized data dashboard where they can see charts, graphs as well as download data submitted. ORH is now offering the option for county mental health and recovery boards to request a data dashboard.

What will these dashboards allow me to do?

- See which organizations in your board area are submitting data using the outcomes tools
- See summary data submitted by organizations for your community
- Download summary charts and graphs related to the data submitted for your community.
